+91-8688059009 | [vuresathvik22@gmail.com](mailto:vuresathvik22@gmail.com) | [linkedin.com/in/vure-sathvik](https://www.linkedin.com/in/vure-sathvik) | [github.com/VURE-SATHVIK-22](https://github.com/VURE-SATHVIK-22)

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, C, C++, SQL

**Frameworks & Libraries:** Spring Boot, Node.js, Express.js, React.js, FastAPI, LangChain, LangGraph, Pandas, NumPy, Scikit-learn

**Databases:** MySQL, MongoDB, Redis, DynamoDB, FAISS, Pinecone

**Cloud & DevOps:** AWS (EC2, S3, Lambda, SQS, API Gateway, IAM), Docker, Git, GitHub, CI/CD, Linux, Apache Kafka, Apache Airflow

**AI / ML:** NLP, LLMs, Transformer Models, Semantic Similarity, Feature Extraction, RAG Pipelines, Prompt Engineering, Embedding Models, Vector Search, Machine Learning, Model Evaluation

**CS Fundamentals:** Data Structures & Algorithms, OOP, System Design, Design Patterns, Operating Systems, DBMS, Computer Networks

## EXPERIENCE

### Software Engineering Intern

Mar 2026 – May 2026

Chakravyuha Dynamics Pvt. Ltd. | Remote

Stack: React.js, Node.js, Vercel, CI/CD

- Built 5+ production web pages with modular React.js components, cutting page load time by 25% and improving cross-device reliability for the company's public-facing site.
- Collaborated with a 3-engineer team to design and ship 3 new site sections (Products, Resources, Careers), applying clean architecture principles that reduced future change costs.
- Set up end-to-end CI/CD pipelines via Vercel with automated deployment workflows — maintained 99.9% uptime and reduced deployment cycle time by 30%.

## PROJECTS

### Self-Healing RAG Pipeline | Python, LangGraph, LangChain, Pinecone, OpenAI API, FastAPI [| GitHub](#) Apr 2025 – May 2025

- Engineered a self-healing Retrieval-Augmented Generation (RAG) pipeline using LangGraph with automated retrieval-validation-retry loops, reducing hallucinated responses by 30% during evaluation on benchmark queries.
- Integrated FAISS/Pinecone vector database for semantic retrieval over 10K+ documents, boosting answer relevance and reducing average retrieval latency by 25%.
- Developed a FastAPI-based service with structured logging, prompt versioning, and automated fallback handling for failed retrieval or low-confidence responses.

### CodeReview AI | Java, Spring Boot, React.js, PostgreSQL, OpenAI API, Redis, Docker [| GitHub](#) May 2025 – Jun 2025

- Engineered an AI-powered code review platform using Java Spring Boot and OpenAI APIs to analyze source code quality, detect vulnerabilities, and generate automated optimization suggestions for multi-language repositories.
- Implemented AST-based static code analysis pipelines for complexity evaluation, code smell detection, and security scanning, improving analysis accuracy and reducing manual review effort significantly.
- Designed scalable RESTful APIs with JWT authentication, GitHub repository integration, and Redis caching, enabling real-time review generation and reducing repeated analysis latency by 35%.

## COMPETITIVE PROGRAMMING & CERTIFICATIONS

- Data Structures & Algorithms: Solved 500+ coding problems across multiple platforms — proficient in Arrays, Strings, Trees, Graphs, Dynamic Programming, Binary Search, Sliding Window, and Two Pointers
- AI Engineer Bootcamp (Udemy) — practical training in building LLM-powered applications, NLP pipelines, transformer models, and production-ready AI APIs
- Data Engineer Bootcamp (Udemy) — end-to-end data engineering covering pipelines, batch and stream processing, SQL/NoSQL databases, and cloud storage

## ACHIEVEMENTS & LEADERSHIP

- Top 6 of 700+ teams (4,000+ participants) — National Hackathon: built a real-time data pipeline that ingested and visualized live sensor feeds under a 24-hour constraint; awarded for technical depth and scalability.
- Top 5 of 200+ participants — Vignan Hackathon: delivered a full-stack web solution with live demo within a 12-hour window; recognized for performance and clean architecture.
- Led web development workshops for 100+ students, covering frontend, backend, and full-stack development; produced reusable curriculum materials adopted by the college tech club.

## EDUCATION

Vignan Institute of Technology and Science

B.Tech in Information Technology | GPA: 8.8 / 10

Hyderabad, India

2023 – 2027
